#### DETAILED ACTION

# Claim Objections - Duplicate Claims

Claim 87 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 86. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

# Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 32 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a species including speech input, does not reasonably provide enablement for the species also including image input. The specification

Application/Control Number: 09/606,350 Page 3

Art Unit: 3625

does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 21, line 11: "said process" should read as --said processor--.

In claim 21, line 19: "In" should read as "in".

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 09/606,350

Art Unit: 3625

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 21-90 are rejected under 35 U.S.C. 102(e) as being anticipated by Walsh et al. (U.S. Patent No. 6,144,848).

Walsh et al. discloses (Fig. 4) a handheld wireless communication device (col. 11, lines 34-46) comprising a processor; a user input device; an audible output device; a wireless transmitter; a wireless receiver; an audible input device; and a memory (see col. 23, line 43-col. 23, line 3). An operator may enter command instructions and data for encoding into a command message using a bar code sensor (404), keypad (405), and/or microphone (402) (col. 23, lines 61-64; see also col. 12, lines 14-26).

Walsh et al. discloses storing information related to an article of commerce in memory and later entering a command to order the article of commerce, for example (col. 33, lines 48-60).

Application/Control Number: 09/606,350 Page 5

Art Unit: 3625

Walsh et al. further discloses that voice messages may additionally be entered as a recognizable voice component of a digital command message (col. 35, line 54-col. 36, line 4).

Walsh et al. additionally discloses that the processor determines a transmission destination (col. 27, lines 48-55). The Examiner notes that in this example destination information is determined based upon bar code information, however, it is also noted that Walsh et al. discloses that keyboard input, and voice input is also equivalent for the purposes of inputting this type of data.

Walsh et al. discloses information for making a purchase which is retrieved from memory of the device (col. 17, lines 15-36).

Methods for using the handheld device are disclosed.

### Response to Arguments

Applicant's arguments with respect to claims 21-90 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3625

### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The additional references cited disclose various features which are similar to those disclosed by Applicant.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
